WORK EXPERIENCE

Software Engineer Intern | Java, AWS, GCP **Splunk**

- **J**une 2021 August 2021
- San Jose, CA
- Worked on Observability Cloud Analytics team to improve real-time streaming capacities and efficiency of platform that drives all metric transformations processed by SignalFx product.
- Developed novel workflow for large window, fine resolution tasks that increased capacity by ~3,500% and cut job migration and restart times by ~700% by offshoring window data to external persistence.

Web Development and Support Lead | JavaScript, AWS **CS Academy**

- May 2019 December 2019
- Pittsburgh, PA
- Drove content creation, testing, and development of free platform for learning computer science principles. Led development of features that improved ease-of-use, achieving a five-fold increase in active users.

RESEARCH

Neural Zeroth-Order Optimization: Empirical Study and Insights **CMU Machine Learning Department**

- **August 2021 May 2022**
- Pittsburgh, PA
- Advised by Prof. Ravikumar for honors senior thesis program, investigating more efficient derivative-free optimization techniques in high-dimensional settings without any assumptions about the underlying objective function.

Adversarial Robustness via Model Ensembles **CMU Machine Learning Department**

- October 2020 May 2021
- Pittsburgh, PA
- Under the mentorship of Prof. Ravikumar, evaluated effects of weighted ensembles of classifiers on adversarial robustness of deep neural networks.
- Witnessed a 1 to 2% (statistically significant) improvement in accuracy on perturbed samples from MNIST and CIFAR-10 datasets.

SELECTED PROJECTS

SafeEvents | Python, Firebase

- August 2020 November 2020
- Developed mobile event tracking application providing COVID-19 risk estimates by locality using active data from Georgia Tech project.
- Used at Univ. of Minnesota Twin Cities and UT Austin.

Dendrogram Generator | R

- **J**une 2020 August 2020
- Nairobi, Kenya
- Created pipeline to convert DNA marker information for different crop varieties into dendrograms to aid in trait association, all wrapped in a GUI.
- Currently in use at International Institute for Tropical Agriculture.

ConvoCoach | Python, GCP

- March 2019 June 2019
- Developed application, along with four colleagues, to assist and improve the capabilities of autistic individuals with daily conversations.
- Utilized cloud NLP, image association, speech recognition and synthesis tools to drive predictive, dynamic conversations.

EDUCATION

B.Sc. in Computer Science **Carnegie Mellon University**

August 2018 - May 2022

University Honors, SCS College Honors

Major: Computer Science

Minors: Machine Learning, Philosophy

COURSEWORK

- Distributed Systems (15-440)
- Algorithm Design and Analysis (15-451)
- Machine Learning (10-315)
- Software Engineering (17-313)
- Programming Languages (15-312)
- Parallel Data Structures & Algos (15-210)
- Computer Systems (15-213)
- Theoretical CS (15-251)

TEACHING

• Research and Innovation in CS (15-300)

SKILLS

ACHIEVEMENTS

Putnam Math Competition Top 500 (out of ~4000)

CMU SCS Dean's List

High Honors (F'20, F'21, S'22)

TartanHacks

Best Social Welfare Hack

President's Award of Kenya

Gold Standard (by H.E. Uhuru Kenyatta)

ACTIVITIES

- Atlas Autonomous Buggy | Software Team September 2019 - May 2020
- Business Technology Club January 2019 - May 2019
- South Asian SA | Student Representative September 2018 - May 2019
